About NICE Actimize

NICE Actimize is the largest and broadest provider of financial crime, risk and compliance solutions for regional and global financial institutions, as well as government regulators. Consistently ranked as number one in the space, NICE Actimize experts apply innovative technology to protect institutions and safeguard consumers and investors assets by identifying financial crime, preventing fraud and providing regulatory compliance. The company provides real-time, cross-channel fraud prevention, anti-money laundering detection, and trading surveillance solutions that address such concerns as payment fraud, cybercrime, sanctions monitoring, market abuse, customer due diligence and insider trading.

Overwhelmed by the manual and mundane?

Let's face it – the work risk & compliance teams have to do isn't getting any easier. Alert volumes keep rising, investigations are becoming more complex, and teams are constantly being asked to do more. The data challenge doesn't help either: a recent global survey showed that over 50% of a typical investigation is manual, and much of this is due to having to look for data in different, disparate systems. This is time consuming and increases the risk of mistakes being made and of inconsistent processes being followed. Taken together with these global trends, organizations have seen sharply rising costs without seeing a similar increase in productivity and risk-management best practices.

The data challenge isn't going to go away all of a sudden, and investigations aren't going to get simpler. So more and more organizations are turning to risk & compliance automation tools that either augment analysts' efforts by ensuring that all the mundane work is completed for them prior to opening an alert or case or, work alongside analysts to improve efficiency, increase speed, and cut down on mistakes. This ensures that analysts have all the information to make better informed and quicker decisions.

Enter Robotic Process automation

Your team's time is valuable and is best spent focusing on risk and making decisions that help you better manage it. NICE Actimize Robotic Process Automation (RPA) helps free up your team to focus on more sophisticated tasks that require their intelligence, human decision making. Specifically, RPA helps automate routine investigation tasks where it isn't integral to have human involvement – think fetching data from other systems, copying and pasting client or account information or prepping a case – and lets your team focus on the issue at hand rather than the specific tasks along the way.

Complete more investigations, faster, and with higher quality.

At a time when organizations are looking for ways to improve efficiency and productivity, the reliance on manual processes keeps them stuck in slow motion.

NICE Actimize RPA

- Lower the cost of risk and compliance
- Reduce investigation Time

NICE Actimize Robotic Process Automation

Robotic Process Automation (RPA) is not new to NICE. With over 500,000 robots deployed, serving more than 400 customers, the RPA solution is bringing the value of automation to the world's largest and most demanding organizations. We have had this solution in our NICE portfolio of products since 2006, the technology has been used with our call center and other back office solutions for many years. We are now enabling it within our NICE Actimize Risk Case Manager.

What is unique about our solution is the combination of both attended robotic automation that works side by side with an analyst and unattended robotic process automation where a digital workforce is deployed to complete tasks.

Automation is necessary to empower financial crime and compliance professionals, lower the cost of compliance and reduce financial crime investigation time.

At NICE, we know financial crime and we know process automation.
